Thrilling 3K

Talented. Fun. Hard working. These are three things that describe 3K the best. This talkative but interactive class enjoys coming to school every day as they love to socialise with their fellow peers.

We had a chat with their amazing teacher, Miss Kladal, and she informed us how her class is going. She said they are settling in well and are enjoying the work they are completing. Although Miss Kladal has come from teaching year five and six, she is delighted to be teaching year three. She explained how she loves doing creative arts, such as singing and dancing, all of which her class shares a passion in. Miss Kladal also likes to teach English, as she has a great love for reading. She mentioned that she loves the fact that if they don’t understand something first, they keep on trying until they know what they are doing.

We spoke to Sean and Rebekah and they said that they are learning about the solar system, and to help them remember the planets, they have been singing the solar system song. They are also learning how to create graphs in Maths and for art, they are drawing self-portraits. They told us that everything they do in class is fun and always look forward to what the day has in store for them.

Like most classes, 3K has an interactive whiteboard, which is where most of their learning happens, and a small reading corner. The wet area is the place where they can let their imagination run free and design creative pieces of art.
In general, 3K have enthusiastic personalities, take pride in all their learning and will be great role models for their younger peers in the future.
